ELECTROKLEEN WITH GSM GATEWAY

The gsm gateway provided as an optional attachment to the Electrostatic oil cleaner enables the operator to communicate with the machine through sms. A sim is required to be inserted into the gateway

The machine sends signals to a preset mobile number when there is an error like High motor current, Oil leakage, Moisture in oil etc.

The operator sitting anywhere can also operate the machine and receive message of the various parameters through sms.

If the operator sends a message “st” to the machine , the machine starts, if he sends “sp”, the machine stops and if he sends a message “ms”, the machine sends an sms on the registered mobile number showing the various parameters on its display screen.

WELTECH			FWD ON
ELECTROKLEEN 100			
0	KV	12.2	REV OFF
300	ma	0.5	
Running hours		0	HV ON
Cumulative hours		0	
STOP	REV	SETTINGS	

The screen of the machine is as shown above and the parameters available to the operator when he sends the sms will be

Pump on/ Pump off , HV on/ HV off

KV , mA , Hours.
